Growing Places Funding for Tees Valley

Tees Valley will receive £5.6 million to fuel local infrastructure projects, the Government announced today.

The Growing Places fund has been allocated through Local Enterprise Partnerships to ensure the one off capital investment is sustainable and delivers projects that will generate further re-investment down the line.

Linda Edworthy, Director of Policy and Strategy at Tees Valley Unlimited said:

“£5.6 million is a significant cash injection for the area and we are delighted that it has been made available to help realise several exciting projects under discussion.

“Establishing successful infrastructure is key to unlocking strong economic growth – it attracts private investment, opens up new markets and creates further job opportunities for people in the area.

“TVU will continue to work with our partners to prioritise the projects and investment activity that will most constructively drive this funding forward.”
